

The diagram shows a building layout with three distinct blocks. Block B1 is a horizontal row of units on the right. Block B2 is a vertical column of units in the center. Block B3 is a horizontal row of units on the left, enclosed in a blue rectangular box. Below this box, the text 'BLOQUE 3' is written in blue. The entire layout is set against a light gray background with a dashed line indicating a boundary or path.

Figure 1 consists of two schematic diagrams of a building layout. Diagram (a) is a top-down view showing the building's footprint with various rooms and corridors. A red area on the left side indicates the location of the fire source. A blue dot in the central corridor indicates the location of the fire detector. Diagram (b) is a side view of the building layout, showing the same footprint from a different perspective. It also highlights the fire source (red area) and the fire detector (blue dot). The diagrams are labeled 'a' and 'b' in the bottom right corner.
